ALOK KR. PATEL

NC, USA • 607-242-1908 • patel.alok.kr@gmail.com • LinkedIn Work Authorization: Green Card

Product Leader with with 18+ years of experience building AI-driven SaaS platforms across fintech, retail-tech, and digital commerce. Proven track record of taking products from 0→1 and scaling them to $20M+ ARR by combining customer discovery, data-driven decision making, and cross functional execution. Experienced translating emerging AI technologies—including LLMs, RAG, personalization, and predictive analytics—into customer-facing products that improve engagement, operational efficiency, and business growth. Passionate about solving complex customer problems through experimentation, scalable platform design, and AI-enabled product innovation.

SKILLS

Product Management: Product Strategy, Product Vision, 0→1 Product Development, Roadmaps, Customer Discovery, Product Analytics, Experimentation, A/B Testing, Platform Products, API Strategy, Go-to-Market, Prioritization, OKRs

AI / Data: Generative AI • LLMs • Retrieval-Augmented Generation (RAG) • NLP • AI Evaluation • Personalization • Predictive Analytics • Risk Modeling • Healthcare Analytics • Decision Intelligence

Business Leadership: P&L Ownership • Pricing & Monetization • Product Growth • Executive Communication • Stakeholder Management • Cross-functional Leadership • Agile • SAFe

Tools & Tech: OpenAI, AWS, Azure, Python, SQL, Kafka, Tableau, Power BI, JIRA, Confluence

Tools: OpenAI, AWS (Bedrock, SageMaker, Kendra), Azure, GCP, Python, SQL, PostgreSQL, Spark, Kafka, Kubernetes, Tableau, Power BI, Streamlit, JIRA, Confluence, Git, React

PROFESSIONAL EXPERIENCE

Technical Product Manager | Cotiviti | *May 2026 – Present*

Healthcare Analytics | Risk Adjustment, Quality Measurement & AI-Driven Data Platforms

- Define product strategy for healthcare analytics solutions supporting risk adjustment, quality measurement, and AI-driven clinical workflows in partnership with Engineering, Clinical, Data Science, and Operations leaders.
- Facilitate customer and stakeholder discovery sessions to identify workflow inefficiencies, prioritize high-value opportunities, and translate business needs into scalable product capabilities.
- Partner with Data Science teams to operationalize predictive models and advanced analytics that improve clinical decision support and healthcare outcomes.
- Prioritize product roadmaps and backlogs within a SAFe environment by balancing customer value, regulatory requirements, technical feasibility, and strategic business goals.
- Leverage SQL, healthcare analytics, and product metrics to validate product hypotheses, uncover operational insights, and guide product investment decisions.
- Influence cross-functional teams to deliver intelligent healthcare products that improve customer adoption, operational efficiency, and measurable business outcomes.

Sr. Product Manager, AI | WhetStones June 2019 – May 2026

Enterprise SaaS | Localized Search, E-commerce & Payments Platform | ARR $20–25M | Reporting to CTO & CPO

- Defined AI product strategy across search, commerce, and payments by analyzing customer behavior, usage analytics, and business performance to prioritize roadmap investments.
- Discovered user friction throughout onboarding, search, and checkout journeys, driving product improvements that increased engagement, conversion, and customer retention.
- Launched AI-powered recommendation and search capabilities that transformed complex ranking, personalization, and retrieval models into intuitive customer experiences.
- Built a reusable AI platform supporting multi-agent orchestration and real-time personalization, enabling faster product development and scalable AI adoption across multiple product lines.
- Developed predictive analytics solutions for pricing, demand forecasting, and customer behavior, reducing customer acquisition cost by 20% while improving merchant decision making.
- Created Monetix and SubsPlus from 0→1, defining MVP strategy, pricing, go-to-market plans, and product iterations that generated new recurring revenue streams.
- Balanced product tradeoffs between model accuracy, latency, scalability, and engineering complexity to ensure reliable AI performance in production environments.
- Influenced engineering, design, sales, and executive stakeholders to align technical investments with long-term business strategy.

Sr. Product Manager | Smartmobe Pvt. Ltd. March 2018 – April 2019

Growth-stage SaaS | Digital Transformation (Retail & Enterprise) | ARR $15–20M

- Identified friction in user onboarding and low engagement across enterprise clients, and led redesign of the onboarding and personalization experience, improving engagement by 40% and increasing lead conversion by 25%.
- Prioritized and launched AI-driven personalization features based on user behavior data, working with engineering to define recommendation logic and continuously iterate based on performance metrics.
- Directed migration from legacy systems to a scalable subscription platform by defining product requirements, evaluating tradeoffs, and ensuring minimal disruption to existing customers—reducing operational overhead by 30%.
- Introduced anomaly detection and automation features after identifying inefficiencies in manual workflows, improving adoption and enabling more scalable operations for enterprise clients.

Sr. Product Manager | Digilokta Pvt. Ltd. August 2014 – March 2018

Fintech SaaS | KYC/AML Compliance & Loan Workflow Management |Lending

- Recognized an opportunity to unify compliance and lending workflows, shaping the product vision for an integrated KYC, AML, and Loan Origination platform.
- Designed Vigya and Loan Engine as a connected ecosystem that streamlined identity verification, compliance, and credit decisioning for financial institutions.
- Accelerated loan approvals by over 50% through ML-powered identity verification and workflow automation that reduced manual processing.
- Built loan lifecycle and portfolio monitoring capabilities that enabled lenders to proactively manage risk and improve portfolio performance.
- Balanced compliance requirements with customer experience by making strategic product tradeoffs that simplified borrower onboarding while maintaining regulatory alignment.
- Drove 40% ARR growth and 35% profitability improvement by delivering scalable compliance solutions that reduced operational costs for enterprise customers.

Project Manager | Cotiviti September 2012 – June 2014

Healthcare analytics company (NYSE: COTV) | Risk Adjustment & Quality Measurement

- Delivered healthcare analytics features supporting risk adjustment cross-functional team on the Medical Intelligence project, integrating DxCG risk models, clinical quality rules, and HEDIS measures to support population health segmentation, risk adjustment, and performance evaluation across payer clients.
- Collaborated with 5 Engineering Managers to define product strategy and delivery roadmap, translating complex clinical requirements into executable technical specifications and ensuring on-time delivery milestones.
- Established structured agile delivery processes and stakeholder reporting cadences that improved team throughput and increased visibility into project health for senior leadership.

KEY PROJECT HIGHLIGHTS

AI Customer Support Platform
Defined and launched an AI-powered customer support platform using OpenAI technologies, reducing customer support tickets by 40% through intelligent intent classification, contextual responses, and automated routing.

AI Search & Personalization Platform
Built reusable AI capabilities powering recommendation engines, semantic search, personalization, and pricing optimization across commerce products.

Vigya + Loan Engine
Designed an integrated KYC, AML, and lending ecosystem that enabled real-time compliance verification and significantly accelerated loan origination.

Predictive Analytics Platform
Delivered machine learning solutions for forecasting, customer behavior prediction, and executive dashboards that replaced manual reporting and improved product decision making.

EDUCATION

MS in Computer Science and AI (Pursuing) Boston University

Bachelor of Engineering, Computer Engineering Kathmandu University
